

Staff Software Engineer · Full-Stack & AI

Staff Software Engineer at Vally, building full-stack products, agentic applications, and developer tooling. One of three engineers working across six connected applications. Developing software since July 2021. Open to US remote and Madison hybrid roles; responsibilities and time commitment need to fit my current full-time Vally commitment.

EXPERIENCE	Vally Current · Full-time Staff Software Engineer - Joined as the second engineer. During my tenure, Vally grew to process tens of millions of dollars in payments, with over 500 independent businesses running daily operations and processing payments through the platform. - Work across all six applications on a three-engineer team, spanning the business portal, customer booking, backend systems, integrations, and support tools. Carry changes through applications and shared packages. - Built authenticated public REST APIs and business partnerships for customer referrals and attribution. - Sole developer of Vally Command, an unreleased agentic interface for business questions and actions, including sales onboarding. Runs on a remote Mastra server with browser tools and reuses portal/API authentication. Maintain it as AI development changes; it is not customer-facing. - Lead coding-agent tooling: skills, workflows, plugins, instructions, linting, TypeScript types, tests, and codebase cleanup.
	Tesseract Corporation Previous Senior Full-stack Engineer - Built web applications for Vally Pro and Eternity RPG, with responsibility for client-side stability, performance, design, and features. - Implemented Next.js pages, browser caching and storage, and progressive web app capabilities. Turned business requirements and user feedback into application improvements.
	Sage Labs Jul 2021 - Jun 2022 Junior React Engineer & Co-founder Built web applications and smart contract integrations on Ethereum and Stacks. Planned, developed, tested, and delivered contracted web projects.

SELECTED WORK	The Red Shed ↗ Small business website with a content management system so owners can update hours, menus, and promotions.
	Brodhead Aviation ↗ Small business website for an aircraft restoration and maintenance company.
	Eternity RPG Browser game built with a small team using React, Redux, and Phaser.

TECHNICAL EXPERIENCE	Automation	Mastra, agentic applications, browser automation, coding-agent workflows, plugins
	Web development	TypeScript, React, Next.js, Tailwind CSS, Redux, Phaser
	Integrations	REST APIs, OAuth, Stripe API, progressive web apps, browser caching
	Developer tooling	Biome, linting, TypeScript types, tests, codebase migrations

EDUCATION	University of Wisconsin Oshkosh	May 2022
	B.S. Computer Science
